DEGLI STUDI  
DI BRESCIA

# WELCOME TO UNIBS!

**Ph.D. Compass Project** aims to encourage, develop and enhance **social interaction and integration** among all the Ph.D. students, by offering them some **educational, cultural and social activities**, by giving them an outline of the current conferences, seminars and workshops which are focused on the development of professional and personal growth and soft skills. They will be informed of the opportunities, services and informal networks offered by the University and many other local institutions.

To make the most of their **professional and cultural experience**, Ph.D. students must seize all the opportunities offered. The University of Brescia and the Collegio Lucchini would like to welcome all the Ph.D. students with a **social evening**, followed by other cultural meetings, including a **tour of the city to see the historical and artistic heritage**.

# PH.D. COMPASS PROJECT

The **Ph.D. Compass Project** has been created by the joint cooperation between the University of Brescia and the Collegio Universitario di Merito Luigi Lucchini, which is a modern hall of residence and a centre of excellence for the training of university students, in the perspective of trying to enrich Ph.D. students' experiences by offering them more opportunities of professional, social and cultural growth.

*"The best teachers are those who show you where to look but don't tell you what to see".*

Alexandra K. Trenfor

# PROFESSIONAL DEVELOPMENT
